

# PEDESTAL HEATER INSTALLATION GUIDE (ADA PEDESTAL)

## HARDWARE IDENTIFICATION

**Warning: The heater element can get extremely hot. Ensure it does not come in direct contact with wires or devices in the Pedestal, or damage may occur.**

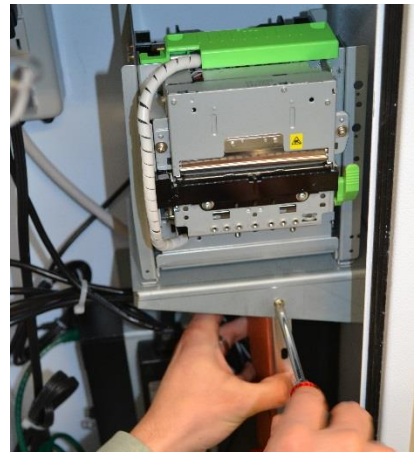

1. Drill a hole in the face of the printer mounting bracket approximately two inches from the edge of the pedestal cabinet.

2. Drill a corresponding hole in the angle plate of the heater element at the opposite end of the thermostat.

3. Attach the heater element to the printer mounting plate with a nut and bolt as shown.

Ensure the thermostat is orientated at the bottom of the heater element.

4. Connect the power plug to an AC outlet.
