What's New in 10.1.2

New Features

C-Store

- Passport - Support Patron Points when user enters phone number at the pump
- Posting Worksheets - Auto-generate and email a Sales Report when worksheets are posted. The Configuration option Email Worksheet Sales needs to be checked and the email addresses need to be entered in the Email Recipients field.

Inventory

- Inventory Detail View – added a Margin column.

Meter Interface

- LCR Meter Ticket – the price per gallon printed on the the meter ticket now includes the discount amount.

Payroll

- 401K Export – added format for Alerus

Sales Tickets

- Agris Export – added configuration options to pad customer reference

Changes

Accounts Payable

- AP To Posting Account View – added a Refresh button to the view
- 2021 1099 changes

C-Store

- Configuration – changed the look and feel of the form

Inventory

- Inventory View – added a Refresh button to the view

Patronage

- Yearly Patronage Calculation – made adjustments to increase performance
- 2021 1099 changes

Point of Sale

- Data is now transferred from the till to the back office via XML files. This will allow POS Tills to be converted from foxpro database to SQL Server database.
- Fixed errors when using SQL Server data and not directly connected to the back office.

Purchase Orders

- Receiving Report – fixed error when using sql server data and the Thermo King format

Remote Batching

- Altered software to transfer data between the back office and the laptops via XML files. This will allow laptops to be converted from fox pro database to sql server database.
- Create Exports - Resolved Syntax Error when click Export.
- Configuration - Changed the look and feel of the form

Sales Tickets

- Customer Activity View – price, total quantity and cost will no longer truncate decimals
- Sales Volume View – resolved error “An invalid value member was passed in for the new MultiColumn ComboBox to be added to the Selection Criteria, chkHistory”.

Supplier Interface

- Format Layouts - Changed the look and feel of the form
- Update Existing Items – Changed the look and feel of the form

Transport Pricing

- Best Price – resolved IndexOutOfRangeException – Index was outside the bounds of the array error.

What's New in 10.1.1

New Features

Bills of Lading:

- Created TX Schedules and Magnetic Media

DTN Import Interface

- Added configuration option to allow Credit Card Settlements to be imported as Negative Charge Tickets.

Meter Interface

- Added MidCom E-Count dual meter capabilities

Sales Tickets

- Chevron Marketers can now submit Rebates and MSA via Red River Software.

TripleE

- Transactions from both the Commander and Pioneer can be imported into Red River Software and will be merged together. Creating a single worksheet that contains all sales.

Changes

Accounts Payable:

- AgVantage Integration – Add configuration option to roll up the line items. Product line will have the total of the product. Freight line will have the total of freight for the Product/Vendor. Tax line will have the total of tax for the Product/Vendor.
- AgVantage Integration – Add configuration option for the offset item (non-product lines).

Accounts Receivable:

- AgVantage Integration – Terms will be exported in the Discount Code field.

DTN Import Interface:

- Added support for CC Category to have a department and location associated with the category in the Configuration.

Inventory:

- Eliminate duplicate Inventory Aging records from being created when an inventory reference is changed using Periodic Procedures/Change Inventory Reference.
- Fixed bugs in Agris Export file after upgrading to Agris version 10.2.0.5.
- Made changes in the Quick Entry form to improve performance when saving.

Passport

- Mobile Pay Type will now be recognized as an Outside Credit Card

Patronage

- Stock/Revolving Fund View – the following columns can have totals and can be used in formulas in a custom column: Allocated – Credit Amount and Paid Amount, Stock – Value Per, Revolving – Credit Amount, Paid Amount, Stock Earned and Credit Used.

Payroll

- Made adjustments for 941 for 2020 (Rev March 2021)
- Made adjustments for 941 for 2021 (Rev June 2021)
- Fixed Federal tax calculation for post 2019 W4 employee

Sales Tickets

- Product Margin View – fixed “Value was either too large or too small for an Int32” error.
- End of Month – fixed errors caused by Open Item customers with a credit balance
- Emailing Statements – SaaS customers using Office 365 need to check the “Use SSL / TLS” option in the Email Configuration. This will resolve the TLS encryption error.

Supplier Interface

- Import Receiving’s (NAXML) now allows importing both Deepwater and Finntech

Transport Pricing

- Data Import - Resolved errors when saving new records

Setup Menu Passwords

- Fixed bug causing the form to crash when expanding Inventory/Operations
